	<b>Emergency Department Utilization (HEDIS)</b>	All	Claims
<i>Cost</i>	(Pending measure review)		

**Populations:** Children, ages 0–9; Adolescents, ages 10–17; Adults, ages 18+. The WHO defines adolescence as the age range 10–19 years. The AAP/Bright Futures defines it as the age range 11–21 years.

**Data Sources:** Claims-only possible refers to the fact that the measure requires use of both claims and other sources (EHR, survey) but using only claims is a feasible alternative.
